# Beebe Medical Center and our commitment to your good health

If you are a longtime resident of the area, you may be surprised at the growth of Beebe Medical Center over the years. We have grown from a small community hospital to a progressive, clinically sophisticated medical center. Our specialty services continue to increase, including comprehensive cancer treatment, expanded cardiovascular services, and a nationally recognized orthopaedic surgery program. While we have grown significantly over the years, we have not lost the importance of making sure our patients receive individualized and compassionate care.

If you have recently moved into the area, we extend a warm welcome! You will be pleased to know that we are fortunate to have a skilled and caring Medical Staff to address your medical needs. New physicians continue to join our Medical Staff to accommodate the area's rapidly growing population. During the past decade, our Medical Staff has more than doubled, attracting top-quality physicians representing several different specialties and extending expert medical care to the people of our communities.

This directory is provided to assist you in your search for a physician. We hope you will take advantage of the expertise of our qualified physicians and their services. Additionally, we invite you to view our website at [www.beebemed.org](http://www.beebemed.org) for more information on services provided at Beebe Medical Center.

Thank you for choosing Beebe Medical Center.

Jeffrey M. Fried, FACHE  
President/CEO

Support your community-owned, not-for-profit hospital through the Beebe Medical Foundation. Call 302-644-2900 for more information.

## WHAT DO THESE SPECIALTIES MEAN?

---

*Medical specialties can be complex and confusing. Below you will find a list of the specialties Beebe offers and a basic guide to what each means.*

### **Anesthesiology**

The study and practice of administering sedation and/or anesthesia to temporarily block pain.

### **Bariatric Surgery**

The branch of medicine that deals with the treatment of obesity.

### **Cardiology**

The study of the heart and its function.

### **Cardiovascular Surgery**

The surgical treatments of diseases affecting the heart and circulatory vessels.

### **Colon and Rectal Surgery**

Surgery pertaining to the colon and rectum.

### **Critical Care Medicine**

The care of critically ill patients. Patients receive continuous and closely monitored care.

### **Dermatology**

The practice of medicine concerned with the physiology and pathology of the skin.

### **Emergency Medicine**

The treatment of emergency illnesses and traumatic injuries.

### **Endocrinology**

The study of hormones and other effects of the endocrine system on the body.

### **Family Practice**

The practice of medicine in which a physician cares for all members of the family for general healthcare.

### **Gastroenterology**

The diagnosis and treatment of diseases of the digestive organs including the stomach, bowels, liver, and gallbladder.

### **General Surgery**

A broad spectrum of surgical conditions affecting any area of the body and the comprehensive management of the trauma victim and the critically ill surgical patient.

### **Hematology**

The science concerned with blood and the blood-forming tissues.

### **Hospitalist**

A hospital-based general physician who assumes the care of hospitalized patients in place of their primary care physician while they are in the hospital.

### **Infectious Disease**

The treatment of infectious diseases.

### **Integrative Health**

The practice of using traditional medicine in combination with alternative/complementary health programs, emphasizing wellness and disease prevention.

### **Internal Medicine**

The diagnosis and medical treatment of diseases and disorders of internal structures of the body.

### **Interventional Cardiology**

Deals specifically with the catheter-based treatment of structural heart diseases and diseases of the arteries that provide blood supply to the heart.

### **Maternal Fetal Medicine**

Practiced by a specialist who, by virtue of additional education, is prepared to care for patients with complications of pregnancy.

### **Medical Oncology**

The study of tumors and cancers.

### **Nephrology**

Science of the structure and function of the kidneys.

### **Neurology**

The study of the nervous system and its functions.

### **Neurosurgery**

Surgery of the nervous system.

### **Nuclear Medicine**

The use of nuclear properties in the diagnosis, treatment, and research of diseases.

### **Obstetrics/Gynecology**

Care for pregnancy, labor, and delivery, as well as prenatal and postnatal care. Gynecology involves diseases and treatment of the female genital tract.

### **Ophthalmology**

The branch of medicine dealing with the eyes.

## **Oral/Maxillofacial Surgery**

Surgery of the jaw, mouth, and face.

## **Orthopaedics**

The branch of medical science that deals with the prevention or correction of disorders associated with the skeletal and/or muscular systems.

## **Otolaryngology**

Surgical and medical treatment of diseases of the ears, nose, throat, and neck.

## **Pain Management**

The application of surgical and medical treatments to control or eliminate acute or chronic pain resulting from a physical injury or other medical condition.

## **Pathology**

The study of the changes in tissues and organs that cause or are caused by disease.

## **Pediatrics**

The branch of medicine that deals with the development, care, and diseases of children.

## **Pediatric Cardiology**

The study of the heart and its function in children.

## **Physiatry**

The diagnosis and treatment of disease and disability by physical means.

## **Plastic Surgery**

Surgery concerned with the restoration, reconstruction, correction, or improvement in the shape and appearance of body structures.

## **Podiatry**

The diagnosis, treatment, and prevention of conditions of the feet.

## **Psychiatry**

The study, prevention, and treatment of mental disorders.

## **Pulmonology**

The study of the lungs and respiratory system.

## **Radiation Oncology**

Treatment of tumors with radiation.

## **Radiology and Diagnostic Imaging**

The use of imaging in the diagnosis and treatment of diseases.

## **Rheumatology**

The division of medicine concerned with acute and chronic conditions characterized by inflammation, soreness and stiffness of muscles, and pain in joints and associated structures.

## **Sleep Medicine**

The study of unusual or disruptive sleep patterns that affect the physical well-being of the body.

## **Surgical Oncology**

Surgery that relates to tumors and cancers.

## **Thoracic/Vascular Surgery**

Surgery pertaining to the chest or to blood vessels outside of the heart and blood supply.

## **Urology**

The medical/surgical specialty concerned with the study, diagnosis, and treatment of diseases of the genitourinary tract.
